Response to Arguments

1. Applicants' argument, see pages 7-8 of remarks, filed November 12, 2004, with respect to the Double Patenting rejection have been fully considered and is re persuasive, and thus the Double Patenting rejection thereof is withdrawn.

Allowable Subject Matter

2. Claims 1-13 are allowed.

3. The following is an examiner's statement of reasons for allowance: The key difference between the instant invention and the closest prior art of (Minot, et al) is the fact that Minot, et al. does not rely upon sampling a signature and obtaining raw data representative thereof using a recursive sampling process. Upon acquisition of a signature data, the instant invention samples the signature and obtains raw data representative thereof using a recursive sampling process, and translates the raw data into high dimension vectors. Thereafter, the instant invention extracts a high order principal components of the high dimension vectors by cumulative orthogonalization using an unsupervised neural network. These features in combination with all the other elements of the claims are not taught or fairly suggested by the closest prior art of Minot, et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
